# INVITATION

## Renewable Energy and Climate Summit Indonesia-the Netherlands Unlocking new capital for renewable energy

Dates and location  
Monday 9 - Friday 13 October 2023  
Jakarta

***The Netherlands government, knowledge and private sector partners are keen to work together with Indonesian counterparts to support the energy transition and boost trade and investment relations in Indonesia. [The Just Energy Transition Partnership \(JETP\)](#) between Indonesia and its international partners calls for renewable energy to comprise at least 34 per cent of Indonesia's power generation by 2030. As one of the JETP implementing partners, the Netherlands is creating investment opportunities for renewable energy to make the transition successful.***

The Renewable Energy and Climate Summit in Jakarta will offer an inspirational view of a sustainable future for Indonesia. It aims to catalyse the renewable energy transition by connecting the Indonesian government, the Dutch and Indonesian private sectors and renowned and qualified investors. Businesses, investors and government partners will gain knowledge of the latest innovations and relevant developments. We will outline a contribution to a sustainable future for Indonesia by sharing knowledge and networks, discussing possible solutions to persistent challenges, and fostering collaboration between the investment space and project developers and matching potential partners.

This Renewable Energy and Climate Summit is organised by the Dutch government (RVO and the Ministry of Foreign Affairs) in close cooperation with the Indonesian government, investment partners and trade organisations. We welcome partners from the Indonesian and Dutch governments, investors, industry, trade and knowledge institutes.

The summit is organized in the week before the Indonesia Maritime Expo (October 17th-19th) in Jakarta. This offers participants the opportunity to visit both the summit and the Indonesia Maritime Expo consecutively.

### Focus on offshore wind and floating solar energy

The thematic focus will be on offshore wind and floating solar energy development. However, during the round tables and workshops we will also address themes like onshore wind, green hydrogen, Carbon Capture and Storage and grid development.

There will be a strong emphasis on unlocking capital by bringing together finance institutes with project developers. Also, we will encourage trade relations and business opportunities between Indonesian and Dutch trade partners.

### Proposed programme during Renewable Energy and Climate Summit

This summit will offer an exclusive knowledge and networking programme for government and business representatives, investors and knowledge institutes. The programme aims to stimulate investments in the Indonesian renewable energy sector, establish or strengthen business relations and share insights into solving bottlenecks for a just energy transition in Indonesia.

#### The programme includes:

- Investors Forum, with - tentatively - participation of World Bank, IFC, ADB, Invest International, and FMO;
- Thematic round tables and workshops with government and State Owned Enterprises, investors and the private sector;
- Matchmaking activities;
- An outlook on Indonesian renewable energy and JETP ambitions;
- Site and company visits.

### Target Audience

The Dutch government aims to invite a group of around 80-100 experts (40-50 from Indonesia, 40-50 from The Netherlands) who are:

- representatives from the Indonesian and Dutch governments working on the (financing of the) energy transition;
- investors active in energy transition financing;
- business leaders active in the renewable energy sector with a focus on offshore wind and floating solar;
- experts from knowledge institutes working on renewable energy development.

### The Renewable Energy and Climate Summit Indonesia – The Netherlands package consists of:

- Full access to all thematic sessions, organised site visits, lunches and networking dinner;
- Participation in networking and matchmaking activities (matchmaking, round tables and workshops).

Costs: € 500 per organisation/company (max. 2 persons)

Please note that the package does not include travel costs to Jakarta (and vice versa), and overnight stay.
